- Models: 1860 (Regular) & 1860S (Small)
- Measurements:

Small: 11 cm x 12.5 cm

Regular: 12.5 cm x 14 cm

Honeywell DC301 N95 Respirator Mask Made in USA (NIOSH)

The DC301 Disposable Respirator is a universal size mask: designed to comfortably fit most facial shapes. The adjustable nose clip helps provide a comfortable: secure seal.

NIOSH, a Federal government regulatory agency, has tested and approved the Honeywell Particulate Respirator DC301, which is designed to help reduce exposure to certain airborne/non-oil based particles

- Exclusive design that minimizes the pressure points and fits comfortably on most faces.
- Humidity and moisture resistant filter media that repels moisture for a longer lasting respirator.
- Strong: rigid outer shell prevents masks from collapsing in high humidity.
- Dual welded head straps secure the respirator comfortably on the user's face.
- Latex free woven head straps reduce the possibility of breakage.
- Honeywell N95 Mask is NIOSH approved
- Available in bulk packaging.
- Expiry Date 10/21/2023.
- Measurements: 14.5 cm x 12.5 cm

apid Antigen Test)

RAPID TESTS

- Textured in fingertips for enhanced grip during all tasks.
- Protects against a wide variety of chemicals.
- Meets ASTM 6319.

Face Shield

Direct Splash Protection

FACE SHIELD

Face Shield (100pcs/Box)

COMFORTABLE & COMPATIBLE WITH YOUR LIFESTYLE

Our comfortable Face Shields are lightweight and can be worn with other personal protective equipment such as masks, goggles or safety glasses as well as personal glasses and hearing aids. This makes them a great fit for any individual, any profession and any working environment!

They're equipped with a foam headband piece and feature a unique, curved construction that contours to the wearer's face. Additionally, these Face Shields are 100% latex-free.

These Protective Face Shields work well in any environment; hospitals, dentistry, health research institution, medicine, pharmaceuticals, food, tattoo and piercing parlours, cosmetics and other industries that may require this form of protection.

A photograph of two healthcare workers in a hospital hallway. They are wearing blue surgical gowns, blue hairnets, and blue shoe covers. They are walking towards the right and smiling. The image is overlaid with a semi-transparent dark grey horizontal band. The word "GOWNS" is written in large, bold, white capital letters across the center of this band.

GOWNS

Isolation Gown Level 1

Use: Disposable gown is lightweight, strong enough for tough duties while still being comfortably breathable and flexible

Universal: Universal size, fit men and women of most sizes while providing comfort and flexibility

Effective: Effectively isolate dust and other harmful substances, cover your body and clothing and create a physical barrier to the transmission of micro-organisms and other substances

Cuffed: To ensure a secure and comfortable wear, our disposable gowns are cuffed and ensure an anti-slip wear

Double ties: The dual ties on the neck and waist ensure complete coverage and a fully closed back

Isolation Gown Level 2

This AAM Level 2 SMS Isolation Gown, with material made of four water repellent layers. The melt-blown layers of the material do not allow perspiration or transition of liquid. The gown is primarily used to avoid exposure to blood, body fluids, and other infectious materials. This gown is lightweight with a full-back and is designed to be generously sized for greater coverage and flexibility. It has neckties, waist ties and knit cuffs for extra protection.

Designed with your safety in mind

We're here to take care of you the way you take care of others. That's why our Infection Control Apparel is engineered to help you keep your clinicians and patients safe every step of the way.

We provide apparel solutions that meet or exceed industry safety standards, including:

- AAMI Level 2 to 4 Gowns
- Chemotherapy Gowns
- Headwear
- Footwear
- Lab Apparel

Infection control guide

Safety starts well before the moment a clinician enters the patient's room. Use the setting usage key and materials descriptions as a guide to select gowns and other apparel, so you can provide the right options for every situation.

Setting usage guidelines

The icons represented below should be used as a guideline in making gown selections for various needs and areas of your facility. Additionally, utilize the AAMI chart (see page 4) for the appropriate level gown.

Material descriptions

Spunbond polypropylene

Standard, cost-effective and comfortable

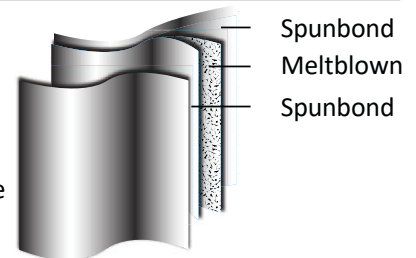

For basic infection control, this non-woven fabric bonds fibers together to form a single layer that is appropriate only for very minimal fluid exposure.

SMS material

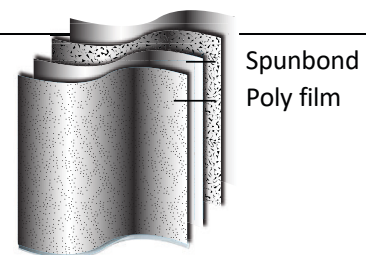

Balanced mix of protection and comfort

Strong and breathable, spunbond/meltblown/spunbond (SMS) is a multi-layer fabric composed of inner layers of meltblown polypropylene between outer layers of spunbond polypropylene that is ideal for extended wear. Light/medium weight SMS is appropriate for low amounts of fluid and heavyweight SMS may be appropriate for moderate contact with fluids.

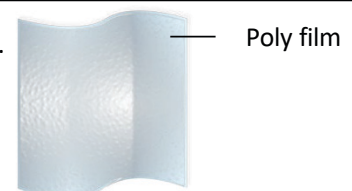

Coated polypropylene ("poly-coated")

Soft, spunbond polypropylene is coated with a layer of polyethylene (plastic) film.

Polyethylene (plastic) film

A single layer of polyethylene (plastic) film provides protection at an affordable cost.

AAMI Level guide

We're your source for AAMI compliant gowns levels 2 through 4. Choose the level you need, based on the orange/blue/purple color coding in the following chart.

AAMI PB70

| ANSI/AAMI PB70 Barrier performance | Test method | Test definition | Requirement | Anticipated fluid exposure |
|---------------------------------------|---|--|--|----------------------------|
| AAMI Level 1 | Water resistance: Impact penetration AATCC 42 | AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact | Water impact < 4.5 g | Minimal fluid levels |
| AAMI Level 2 | Water resistance: Impact penetration AATCC 42 Water resistance: Hydrostatic pressure AATCC 27 | AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact AATCC 127 Measures the resistance of fabrics to the liquid penetration of water by impact under constant and | Spray impact \leq 1.0 g Hydrostatic pressure \geq 20 cm | Low fluid levels |
| AAMI Level 3 | Water resistance: Impact penetration AATCC 42 Water resistance: Hydrostatic pressure AATCC 27 | AATCC 42 Measures the resistance of fabrics to the liquid penetration of water by impact AATCC 127 Measures the resistance of fabrics to the liquid penetration of water by impact under constant and increasing hydrostatic pressure | Spray impact \leq 1.0g Hydrostatic pressure > 50 cm | Moderate fluid levels |
| AAMI Level 4 | ASTM F1671, Standard Test Method for Resistance of Materials Used in Protective Clothing to Penetration by Bloodborne Pathogens Using Phi-X174 Bacteriophage Penetration as a Test System | ASTM F1671 Measures the resistance of materials used in protective clothing to penetration by bloodborne pathogens using a surrogate microbe under conditions of continuous liquid contact. | Pass | High fluid levels |

Association for the Advancement of Medical Instrumentation. **Liquid Barrier Performance and Classification of Protective Apparel and Drapes Intended for use in Health Care Facilities.** ANSI/AAMI PB70:2012. Arlington, VA: AAMI.

A healthcare worker wearing a blue bouffant cap, a blue surgical mask, and a blue gown is holding a white tray with a metal cup. The background is a blurred clinical setting. A dark grey horizontal band is overlaid across the middle of the image, containing the text.

HEADWEAR AND FOOTWEAR COVER

Comfortable coverage

Our headwear and footwear cover all your personal protective equipment (PPE) needs — so you can focus on the task at hand.

Headwear

From surgical caps and hoods to our premium bouffants, our headwear is designed to be comfortable and provide you with necessary coverage at the same time. Headwear is available in a variety of styles, colors and sizes to help you feel most protected.

Footwear

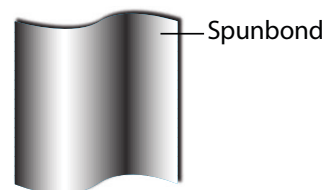

Our durable footwear is constructed of materials ranging from basic spunbond polypropylene to polyethylene-coated spunbond/meltblown/spunbond (SMS) to accommodate a wide range of intended uses. Footwear is available in a variety of styles and sizes to meet your needs.

Materials

Spunbond polypropylene

Standard, cost-effective and comfortable

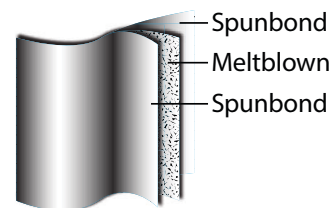

For basic infection control, this non-woven fabric bonds fibers together to form a single layer that is appropriate only for very minimal fluid exposure.

SMS material

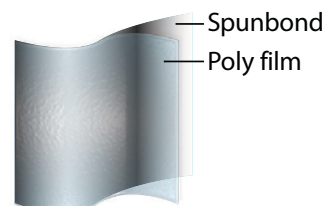

Balanced mix of protection and comfort

Strong and breathable, spunbond/meltblown/spunbond (SMS) is a multi-layer fabric composed of inner layers of meltblown polypropylene between outer layers of spunbond polypropylene that is ideal for extended wear. Light/medium weight SMS is appropriate for low amounts of fluid and heavyweight SMS may be appropriate for moderate contact with fluids.

Coated polypropylene (poly-coated)

Soft, spunbond polypropylene is coated with a layer of polyethylene (plastic) film.

Comfort bouffant caps

Our lightweight, comfortable bouffant caps are made of non-woven, spunbond polypropylene fabric. The gentle synthetic elastic provides a generous fit and secure coverage without binding.

| Cat. no. | Description | Packaging |
|--------------|--|------------------|
| 3224R | Red comfort bouffant, 24 in. | 100/bx, 4 bx/cs |

| 5859 | Skid-resistant shoe cover | XX-Large | 100/bx, 4 bx/cs |

Coated polypropylene (poly-coated) shoe covers

For use in fluid-intensive conditions, Cardinal Health™ FullGuard™ Shoe Covers are made of durable polypropylene fabric that meets ASTM F1670 and ASTM F1671. Patented separate elastic band at the ankle minimizes the chance of fluid strike-through by eliminating pinholes caused by stitched-in elastic. Bound elastic seams at the foot reinforce fluid protection and adjust for a customized fit. Foam strips provide anti-skid protection and assist in donning orientation.

FullGuard™ Shoe Covers provide fluid-intensive protection throughout.

| Cat. no. | Description | Size | Packaging |

A close-up photograph of a woman with blonde hair using a white digital thermometer on a baby's forehead. The baby has blue eyes and is wearing a light-colored, textured shirt. The woman is smiling slightly. The thermometer has a small digital display and the brand name 'tommee tippee' printed on it. The background is a plain, light-colored wall.

DIGITAL THERMOMETER

Ultra Forehead Temperature Indicator

Rectal thermometer

Oral thermometer

Digital thermometer probe covers

Healthcare professionals and their patients need a wide range of temperature monitoring products to ensure quality and accuracy of treatment. From single to dual-scale, our digital thermometers measure temperature rapidly and accurately in either Fahrenheit or Celsius.

Digital Thermometers

- Easy-to-read LCD display
- Last temperature taken memory capability
- Audible alarm signals, one beep at start-up, 10 beeps max at peak temperature
- Auto turn-off after five (5) minutes of inactivity
- Available in Fahrenheit, Celsius, or switchable Dual Scale
- Standard 60 second read or Quick Read option for faster measurement
- Oral or rectal* thermometers
- Probe covers available separately
- Individually boxed or economical polybags available

*Rectal thermometers come with a red cap for easy identification. Probe covers for rectal thermometers are pre-lubricated.

Ultra Forehead Temperature Indicator

- Encapsulated liquid crystal technology, displays accurate temperature changes in seconds
- Non-invasive and inexpensive alternative to electronic probes
- Indicates temperatures in °C and °F scales with accuracy to $\pm 1^{\circ}$ Fahrenheit.
- Ideal for use with laryngeal masks and mac or regional anesthesia when intubation is not used
- Discrete temperature events
 - A green color indicates the temperature attained
- Not made with natural rubber latex.

Genius™ 3 Tympanic Thermometer Instructions for use

Taking a Temperature

Inspect the patient's ear anatomy for proper probe placement. (No blood or fluid should be present.)

Remove the thermometer from the base.

Inspect the probe lens. It should be shiny and free of cracks or debris without a probe cover attached. (Clean lens with a dry lint-free swab or lens wipe if needed.)

Attach a probe cover by aligning the silver tip with a probe cover and push straight down until you hear a snap. Inspect the membrane on the end of the probe cover. If a hole or tear is visible, discard and attach a new probe cover.

Ensure the probe cover is securely seated on the probe. The silver probe should not be showing. A probe cover **MUST** be used.

Insert the tapered probe tip. Align the probe at the entrance of the patient's ear canal. Immediately press the large triangular scan button located in the center of the handle. A triple beep will sound when the scan is completed.

Press the eject button to dispose of the probe cover in a waste receptacle.

Optional Functions

Return the thermometer to the base unit for storage. The LCD display will go into "sleep" mode after 10 seconds of inactivity.

To recall the last temperature, press and release the scan button before loading another probe cover. Loading a new probe cover will erase the last temperature taken from the memory.

Use ONLY the approved cleaning methods outlined in the Operating Manual.

To change the temperature display, press and hold the C°/F° button for 2 seconds when the LCD screen is active.

To use the 60-second pulse timer, press and hold the clock icon button for 2 seconds to activate.

Press and release the clock icon button once to begin. (Beeps will be heard at 15-second intervals.) The thermometer will automatically shut off at 60 seconds. If finished before a full 60 seconds, press and release the clock icon button again to deactivate.

Dr. Talbot's Infrared Forehead Digital Thermometer

Now you can measure quick and accurate body temperatures using the Dr. Talbot's infrared digital thermometer. This forehead thermometer takes readings from a distance in a second and doesn't require any contact with the skin. The big LED screen displays fever warnings and has a memory recall if you need to check the previous readings.

- Suitable for children 2 years and up, as well as adults
- Contactless 1-second measurement from 2 inches (5cm) away from the subject ensures safe, quick, and accurate results
- Large LED screen offers easy viewing
- Fever warning indication notifies you in case there is a rise in body temperature
- Forehead mode measures the temperature by sensing infrared emission of the skin at a measured point
- Accurately measures Fahrenheit and Celsius within +/- 0.4 degrees Fahrenheit or +/- 0.2 degrees Celsius
- Runs on 2 AAA batteries (not included, sold separately)

Measures in 1 second

Accurately measures Fahrenheit & Celsius within $\pm 0.5^{\circ}\text{F}$ or $\pm 0.3^{\circ}\text{C}$ *

Fever indication

Recommended for children over 2 years old and adults

HoMedics No-Touch Infrared Thermometer

These days, quick temperature checks are essential and this HoMedics No-Touch infrared thermometer makes it easy. Just point the thermometer at your forehead and receive an accurate temperature reading in just one second. You can also check the temperature of food, liquids, and the room around you for versatile functionality.

- Infrared technology measures body, food, liquid, and room temperatures in just one second without making contact
- Celsius and Fahrenheit options, backlight display, and a red-light fever alarm make readings incredibly easy to see and interpret
- Built-in memory stores up to 30 temperature readings so you can track changes over time
- Quiet nighttime mode allows you to take your child's temperature in the middle of the night without waking them
- Auto power off function and a low-battery indicator ensures efficient operation
